2022	-	-	-	-	-	-	100.00%	-
2021	-	-	-	-	-	-	100.00%	-

RISK DISCLOSURES

KKR Real Estate Select Trust Inc. ("KREST") is a non-diversified, closed-end management investment company that intends, under normal market conditions, to invest at least 80% of its net assets (plus the amount of its borrowings for investment purposes) in a portfolio of real estate, including in the form of direct property investments and debt interests and to a lesser extent in traded real estate-related securities. KREST is a Maryland corporation and has elected to be taxed as a real estate investment trust for U.S. federal income tax purposes under the Internal Revenue Code of 1986, as amended.

Summary of Risk Factors. Investing in KREST involves risks, including the risk that a stockholder may receive little or no return on his or her investment or that a stockholder may lose part or all of his or her investment. KREST should be considered a speculative investment that entails substantial risks, and a prospective investor should invest in KREST only if they can sustain a complete loss of their investment. You should read the prospectus carefully for a description of the risks associated with an investment in KREST. These risks include, but are not limited to, the following:

An investment in KREST is suitable only for investors who can bear the risks associated with private market investments with potential limited liquidity. Shares of KREST's common stock (the "Common Stock") should be viewed as a long-term investment within a multi-asset personal portfolio and should not be viewed individually as a complete investment program.

KREST expects to ordinarily pay stable distributions at an attractive distribution yield on a monthly basis; however, KREST cannot guarantee that it will make distributions and the amount of distributions that KREST may pay, if any, is uncertain.

KREST may pay distributions from sources other than cash flow from operations, including, without limitation, the sale of assets, borrowings, return of capital, or offering proceeds.

Investors will pay offering and organizational expenses and, with respect to certain share classes, may also bear upfront sales loads and/or dealer manager fees. Investors in Class I Shares, Class D Shares and Class U Shares may be charged transaction or other fees directly by financial intermediaries. The Fund will also pay KKR Capital Markets LLC (the "Distributor") servicing and/or distribution fees with respect to certain share classes. Generally, the Distributor will pay all or a portion of the servicing and/or distribution fees to participating selling agents. Please refer to the prospectus for additional information regarding the fees and expenses related to an investment in KREST. You will have to receive a total return at least in excess of these expenses to receive an actual return on your investment.

The Common Stock has no history of public trading, nor is it currently intended that the Common Stock will be listed on a public exchange or any other trading market in the near future. No organized secondary market is expected to develop for KREST's shares. Limited liquidity may be provided through periodic tender offers at KREST's net asset value per share of Common Stock.

There is no guarantee that repurchases will occur or that an investor will be able to sell all the Common Stock that the investor desires to sell in a tender offer. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Due to these restrictions, an investor should consider an investment in KREST to be illiquid.

Investing in the Common Stock may be speculative and involves a high degree of risk. The Fund employs leverage, which increases the volatility of investment returns and subjects the Fund to magnified losses if investments decline in value.

The Fund's investments in real estate are subject to the risks typically associated with real estate, including but not limited to: local, state, national or international economic conditions; lack of liquidity inherent in the nature of the asset; reliance on tenants and property managers; financial difficulty or lease default of a major tenant; and interest rate fluctuations and lack of availability of financing.

Many countries have experienced outbreaks of infectious illnesses in recent decades, including swine flu, avian influenza, SARS and COVID-19 (the "Coronavirus"). The ongoing spread of the Coronavirus has had, and will continue to have, a material adverse impact on local economies in the affected jurisdictions and also on the global economy, as cross border commercial activity and market sentiment are increasingly impacted by the outbreak and government and other measures seeking to contain its spread. The operations of KKR (including those relating to KREST) have been, and could continue to be, adversely impacted, including through quarantine measures and travel restrictions imposed on KKR personnel or service providers based or temporarily located in affected countries, or any related health issues of such personnel or service providers. Any of the foregoing events could materially and adversely affect the KREST's ability to source, manage and divest its investments and its ability to fulfill its investment objectives. Similar consequences could arise with respect to other comparable infectious diseases.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

Past performance is no guarantee of future results. This sales material must be read in conjunction with KREST's prospectus in order to fully understand all the implications and risks of an investment in KREST. Please consult a financial professional for share class availability and appropriateness. This sales material is neither an offer to sell nor a solicitation of an offer to buy securities. An offering is made only by the prospectus, which must be made available to you in connection with this offering and is available at www.krest.reit Prior to making an investment, investors should read the prospectus, including the "Risks" section therein, which contain the risks and uncertainties that we believe are material to our business, operating results, prospects and financial condition. Numerical information is approximate and as of February 1, 2025, unless otherwise noted. The words "we," "us" and "our" refer to KREST and its subsidiaries, unless the context requires otherwise.

An investment in KREST is not a direct investment in real estate, and has material differences from a direct investment in real estate, including those related to fees and expenses, liquidity and tax treatment. KREST's share price is subject to less volatility because its per share NAV is based on the value of the real estate assets it owns and is not subject to market pricing forces as is the price of corporate and treasury bonds. Although KREST's share price is subject to less volatility, the value of real estate may fluctuate and may be worth less than was initially paid for it. KREST shares are significantly less liquid than US REITs, equities and corporate bonds, and are not immune to fluctuations.
